

Atmire Coolair linear pen is comprised of the Atmire Ablator and Single Use Catheter (ASC). Includes instructions for use and safety warnings.

INDICATION FOR USE: The Coolair linear pen is a sterile, single use electrocautery device intended to ablate cardiac tissue using radiofrequency (RF) energy.

CONTRAINDICATIONS: Do not use intended for contemporary radio ablation (permanent female sterilization). Includes warnings about use on patients with pacemakers or defibrillators.

POTENTIAL COMPLICATIONS: Includes risks of myocardial infarction, stroke, and other complications. Lists symptoms to watch for, such as chest pain or shortness of breath.

Atmire Coolair linear pen is supplied as a STERILE instrument and is a single patient use only. Includes instructions for handling and disposal.
