

AtriClip Devices

Reduce the risk of stroke*

>98%
successful LAA
exclusion¹

AtriCure's AtriClip products are the most widely sold Left Atrial Appendage (LAA) management devices worldwide.

Epicardial Exclusion

- Implant is not in the blood stream
- Ischemic injury electrically isolates the LAA
- Atrophy and resorption of the LAA

Dynamic Closing Force

Continuous closing force maintains LAA exclusion throughout changes to the tissue caused by ischemia

Parallel / Linear Closing

Minimized occurrence of tissue folds with optimal apposition of tissue along long axis of LAA ostia

Tissue Compression / Atraumatic

No cutting, non-piercing, and atraumatic compression reduces risk of tissue tearing and bleeding

Stroke* risk reduction

Indicated for use in patients at high risk of thromboembolism for whom left atrial appendage exclusion is warranted

Now recommended **Class I**
by ESC/EACTS 2024
Recommendations

*Originated from the LAA

The Closed Loop AtriClip Devices

The Open AtriClip Devices

Open accesses

AtriClip FLEX®

Features

- Plunger grip
- 6 cm flexible shaft
- Available in four sizes

Open accesses

AtriClip FLEX•V®

Features

- Small Footprint to Minimize the Interference with Adjacent Structures and Enhance LAA Visualization
- Suture-Less Clip Deployment
- Reduced Fatigue Clip Opening Lever
- One handed application

Minimal accesses

AtriClip PRO®

Features

- Quick deploy feature
- 25cm rigide shaft
- ±30° omnidirectional head articulation with lock
- Includes Selection Guide (CGG)

Minimal accesses

AtriClip PRO•V®

Features

- 12 mm Port Compatibility
- Tip-First Closure
- Opened-Ended Design Clip

AtriClip PRO2®

Features

- Hoopless End Effector
- Active Articulation Levers
- Small Diameter End Effector (12 mm)
